

N HARSHITH RAJE URS

harshh2428@gmail.com | +91-6362128332 | Karnataka, India

PROFESSIONAL SUMMARY

Software Engineer with an MCA and hands-on experience in Java, Python, REST APIs, backend development, and data-driven applications. Strong in OOP, DSA, SDLC, debugging, testing, databases, and Git, with Microsoft Azure AI Fundamentals certification.

TECHNICAL SKILLS

- **Programming :** Java, Python, C, JavaScript, OOP, Data Structures & Algorithms, SQL
- **Backend & Development:** Spring Boot, Flask, REST APIs, Node.js, Git/GitHub, MySQL, SQLite
- **Cloud, Data & Engineering:** Microsoft Azure, Data Analytics, Machine Learning, SDLC, Agile, API Testing

INTERNSHIP / WORK EXPERIENCE

IT & AI SPECIALIST

We Care Lifts Pvt Ltd | June 2026 – Present

- Develop and maintain responsive web applications, company websites, REST APIs and database-driven solutions using modern web applications.
- Build **AI-powered solutions, automation workflows, and data-driven applications** using Python, Generative AI, APIs, and analytics tools.
- Translate business requirements into practical **software, IT, AI, and data solutions**, while troubleshooting and improving existing applications and systems.

WEB DEVELOPMENT INTERN

Proxenix | June 2025 – Aug 2026

- Developed real-time applications using JavaScript, Node.js, and Socket.io.
- Implemented REST APIs, authentication workflows, database integrations, and backend services.
- Performed debugging, testing, optimization, and Git-based version control across the SDLC.

SOFTWARE ENGINEERING INTERN

MindSetCraft Pvt Ltd | May 2025 – June 2026

- Developed Python/Flask applications and REST APIs for real-time audio classification.
- Implemented data preprocessing, feature extraction, prediction workflows, logging, and error handling.
- Conducted testing, model optimization, and performance improvements for production-oriented workflows.

PROJECTS

IIOT GUARD

Python, Flask, REST APIs, SQLite, JavaScript

- Engineered a Python/Flask backend to process and analyze network data, exposing functionality through REST APIs
- Implemented SQLite-driven workflows for storing, retrieving, and processing network-analysis data
- Built a responsive frontend integrated with backend APIs, optimizing performance and data processing
- Applied engineering practices across API integration, debugging, and testing

NARRATO AI

Node.js, JavaScript, React Native, REST APIs, AI APIs

- Built an AI-powered application using Node.js, integrating ChatGPT and DALL·E APIs for automated content generation
- Developed backend workflows for API communication, request processing, and service integration
- Structured frontend and backend into modular components for maintainability and extensibility

REAL TIME CHAT APPLICATION

Node.js, JavaScript, Socket.io, WebSockets

- Developed a real-time communication app using Node.js and Socket.io for low-latency messaging
- Implemented backend workflows for event handling, message transmission, and client-server synchronization
- Tested and debugged functionality to improve reliability of real-time data transmission

EDUCATION

MASTER OF COMPUTER APPLICATIONS

2023 - 2025

The National Institute of Engineering | GPA : 8

BACHELORS OF COMPUTER APPLICATIONS

2020 - 2023

University of Mysore | GPA : 8.225

CERTIFICATIONS AND AWARDS

- Microsoft Certifies: Azure AI Fundamentals
- Java Developer
- Cisco Data Analytics Essentials
- Generative AI Certification

RESEARCH

DEEP LEARNING BASED LIFI CHANNEL OPTIMIZATION FOR SMART CITY IOT SYSTEM

- Proposed a CNN-LSTM model for LiFi channel prediction and resource optimization in Smart City IoT environments.
- Analyzed IoT signal datasets and evaluated SNR, BER, and spectral efficiency through simulation-based experiments
