N HARSHITH RAJE URS

SOFTWARE ENGINEER | PYTHON | GENERATIVE AI

India | +91 6362128332 | harshh2428@gmail.com | N Harshith Raje Urs Portfolio

Open to Relocation to UAE

PROFILE SUMMARY

Software Engineer with experience in Python, backend development, REST APIs, Generative AI, machine learning, and data analytics. Skilled in developing web applications, integrating LLMs, automating workflows, and building data-driven solutions. Open to diverse IT opportunities in Dubai, UAE, with willingness to relocate.

CAREER TIMELINE

June 2026 - Oct 2026 *Software Engineer*, **We Care Lifts Private Limited, Mysuru, India**

Oct 2025 - May 2026 *Solution Engineer*, **Printmac, Mysuru, India**

WORK EXPERIENCE

Software Engineer,* We Care Lifts Private Limited** ***June 2026 - Oct 2026

- Developed and maintained the corporate website to strengthen digital presence, improve online accessibility, and support customer acquisition through digital channels.
- Engineered a quotation builder application to streamline quotation generation, standardize business documentation, and reduce manual processing across sales workflows.
- Developed AI-powered chatbots using Generative AI and LLM APIs to automate business queries, improve information accessibility, and support efficient customer interactions.
- Built interactive Streamlit dashboards using Python, Pandas, NumPy, SQL, and Plotly to analyze 700+ customer records and visualize sales performance, enquiries, follow-ups, and operational KPIs.
- Integrated REST APIs and automated business workflows to streamline data exchange, minimize repetitive tasks, and improve operational efficiency
- Developed internal business applications for customer data management, enquiry tracking, and follow-up monitoring, improving information visibility and supporting data-driven decision-making.
- Managed application testing, debugging, deployment, Git/GitHub version control, and ongoing maintenance to ensure application reliability and continuous improvement.

Solution Engineer, Printmac ***Oct 2025 - May 2026***

- Developed 2+ internal web applications using Python, Flask, JavaScript, HTML, CSS, and SQL for customer management, quotations, and order tracking.
- Structured and maintained 300+ business records, improving data accessibility and reducing manual record-management effort by 30%+.
- Created Power BI dashboards for sales, product, customer, and enquiry analytics, improving reporting visibility by 25%+.
- Automated 3+ routine processes for data processing, quotation preparation, and report generation, reducing repetitive manual work by 35%+.
- Supported application testing, debugging, troubleshooting, and data management, improving the reliability of internal business workflows.

Web Development Intern, Proxenix ***June 2025 - Aug 2025***

- Developed two web applications, A Real time Chat Application and an online learning platform using modern web technologies and database integration.
- Engineered real-time messaging functionality using JavaScript, Node.js, Express.js, and Socket.IO, supporting instant message delivery, group conversations, emoji reactions, notifications, and message history retrieval.

- Implemented backend REST APIs, and event-driven communication workflows to support application functionality, data exchange and client-server interactions.
- Contributed to an online learning platform featuring user authentication, course management, learner progress tracking, notifications, and discussions functionality, with Mongo DB based data management.
- Performed application testing, API validation, debugging, and database integration to improve functional reliability, data consistency, and user experience across web applications.

Machine Learning& Web Development Intern, MindSetCraft Pvt Ltd ***May 2025 - June 2025***

- Developed a bird species identification web application using Python, Flask, HTML/CSS, and SQLite, trained on 10,000+ audio samples across 15 bird species.
- Processed audio at 22,050 Hz, using noise reduction, trimming, normalization, and MFCC feature extraction with Librosa for classification.
- Trained and evaluated an MLP classifier using Scikit-learn with an 80:20 train-test split, using Label Encoder and Pickle for label processing and model persistence.
- Integrated the trained model into a Flask web application for audio upload and near real-time species prediction with confidence scores, supported by lightweight SQLite data storage.

PROJECTS

- ***Narrato AI:*** Built an AI story and comic generation platform using React Native, Node.js, ChatGPT API, and DALL-E API, integrating AI generated text and images into a unified application.
- ***BusinessIQ:*** Built a real-time sales analytics dashboard using Python, Streamlit, SQLite, SQL, and Plotly, featuring KPI tracking, sales analysis, and interactive visualizations.
- ***IIoT Guard:*** Developed a Flask-based cyber-threat detection system using Python, REST APIs, SQLite, and JavaScript for threat monitoring and data processing.
- ***Keep Me Safe:*** Developed a personal safety application focused on user protection and emergency assistance, incorporating safety-oriented features to support quick access to help and improve user security.

RESEARCH AND PUBLICATIONS

Deep Learning Based LiFi Channel Optimization for Smart City IoT Systems

Proposed a CNN-LSTM framework for LiFi channel prediction and adaptive resource optimization in smart-city IoT environments. Achieved up to 34% improvement in SNR, 41% reduction in BER, and 28% increase in spectral efficiency through simulation-based evaluation.

EDUCATION

Master of Computer Applications *2023 - 2025*
The National Institute of Engineering Mysuru, KA, India

Bachelors of Computer Applications *2020 - 2023*
Hindustan College Mysuru, KA, India

PROFESSIONAL SKILLS

Programming: Python, Java, JavaScript, SQL, HTML, CSS
Web & Backend: Flask, Node.js, Express.js, Spring Boot, REST APIs, React Native
AI & Data: Machine Learning, Generative AI, LLM APIs, Pandas, NumPy, Power BI, Data Analytics, Data Visualisation
Databases & Cloud: MySQL, SQLite, AWS Fundamentals, Cloud Computing, Linux, CI/CD
Tools & Automation: Git, GitHub, Postman, VS Code, API Integration, Application Testing, Debugging, Workflow Automation.

LANGUAGES KNOWN

English, Hindi, Kannada, Telugu
